**Re: WT Docket No. 01-309
HAC Digital Wireless Telephones**

Fourth Semi-Annual Report

Dear Ms. Dortch:

The Filer, CC Communications, is the licensee of Cellular Radiotelephone Service Station KNKN223. This report is submitted pursuant to the requirements of Paragraph Nos. 89 – 91 of the Commission's Report and Order (WT Docket No. 01-309), FCC 03-168, released August 14, 2003 ("R&O").

By way of background information, the Filer is a small, Tier III Commercial Mobile Radio Service licensee, as defined in the Commission's E-911 Order to Stay, FCC 02-210, released July 26, 2002. The Filer provides Frequency Block B cellular service to the Nevada 1 – Humboldt RSA. The digital portion of the Filer's wireless system employs the Code Division Multiple Access ("CDMA") air interface. The Filer currently markets the following CDMA digital wireless telephones: A) Motorola Models V60s, V260, V262, E310 and V710; B) Kyocera Models SE44-SLIDER, KX1-SOHO, Koi and KX9; C) Nokia Models 6015, 6225 and 6255; D) Audiovox Model 8910; and E) LG Models 3200, 5200, 5550 and 6100. Of these, the Motorola Models V262 and V710 meet a U3 (or M3) rating under ANSI Standard C63.19. Upon information and belief, none of these units meets a U3T (or M3T) rating under ANSI Standard C63.19.

To achieve compliance with the Hearing Aid Compatibility ("HAC") requirements of the R&O, the Filer is literally at the mercy of the handset manufacturers to develop and market HAC-compliant digital wireless handsets. As a small, Tier III wireless carrier, the Filer has no influence over the product development and distribution decisions of wireless handset manufacturers; and, accordingly, must rely on the manufacturers to develop HAC-compliant digital wireless handsets for use on the Filer's system.

Given the foregoing, the information requested by the Commission is identified as follows:

Item 1 -- Digital Wireless Phones Tested: The Filer has not tested any digital wireless telephones for HAC compliance. All testing will be done by the handset manufacturers.

Item 2 -- Laboratory Used: None. See Response to Item 1.

Item 3 -- Test Results For Each Phone Tested: Not applicable. See Response to Item 1.

Item 4 -- Identification Of Compliant Phone Models and Ratings According To ANSI C63.19: Two of the digital wireless handsets marketed by the Filer, the Motorola Models V262 and V710, meet a U3 (or M3) rating under ANSI Standard C63.19. Upon information and belief, none of the handsets marketed by the Filer meet a U3T (or M3T) rating under ANSI Standard C63.19.

Item 5 -- Report On The Status Of Product Labeling: None. It is anticipated that product labeling will be handled by the handset manufacturers.

Item 6 -- Report On Outreach Efforts: The Filer is developing a hearing aid compatibility information sheet to assist hearing impaired customers in selecting current model phones and accessories most suitable to their needs.

Item 7 -- Information Related To Retail Availability of Compliant Phones: See Response to Item 4.

Item 8 -- Information Related To Incorporating Hearing Aid Compatibility Features Into Newer Models Of Digital Wireless Phones: The incorporation of HAC features into newer models of digital wireless telephones will be accomplished by the handset manufacturers.

Item 9 -- Any Activities Related To ANSI 63.19 Or Other Standards Work Intended To Promote Compliance With The Requirements Of The Commission's Report and Order: None.

Item 10 -- Total Numbers Of Compliant And Non-Compliant Phone Models Offered As Of The Date Of This Report: See page 1 of this report.

Item 11 -- Any Ongoing Efforts For Interoperability Testing With Hearing Aid Devices: Interoperability testing will be performed by the handset manufacturers.

Very truly yours,

CC Communications
